

## How to configure your Android device (4.1.2 or higher) to use SJECCD-MOBILE wireless network.

**⚠ NOTE:** Getting to the Wi-Fi settings on every Android device is different depending on the OS version and the phone model but once you get to the Wi-Fi section the settings should be the same.

1. To begin, go to your Applications or **Programs** list and choose **Settings**, then select **Wi-Fi**

2. Select “SJECCD Mobile” from the list available Wi-Fi networks.

3. Scroll down to and change the “Phase 2 Authentication” to “MSCHAPV2”
4. Under “Identity” enter your email address, and then your email password.
5. Press the “Save” button.
6. -Done-
